1. Claims 3-7 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on November 6, 2006.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cur et al. (U. S. Pat. No. 4,987,627).

Re claims 1 and 2, note that Cur discloses the detergent, bleach and softener reservoirs (54, 52 50) and valved water supply (66, 64 and 62) associated therewith that differs from the claim only in the recitation of the second valve being directed to either the bleach or softener reservoir and the reservoirs being arranged as claimed. Nonetheless, to have the components arranged as claimed is deemed to be a mere rearrangement of parts (MPEP 2144.04 REVERSAL, DUPLICATION OR RE-ARRANGEMENT OF PARTS) and is of little patentable weight absent and new or unobvious results.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Jarvis, Clark et al., Blackburn, Gerhardt et al., Berndt et al., and Mandarino, Jr. et al., note the supply means.
